

How and where will revisions and/or modifications to SDSs be communicated?

You are here:

[EDQM FAQs](#) / [EDQM FAQs in English](#) / [QUALITY & SAFETY](#) / How and where will revisions and/or modifications to SDSs be communicated?

Answer:

If the hazard classification is affected (section 2), a new version is generated with a new issue date, revision date and supersedes date.

Changes made to SDSs that do not affect the hazard classification are detailed in section 16 of the SDS. The version number remains the same.

The EDQM also provides its users with [a cumulative list containing all classification modifications](#).
