[EDQM FAQs](#) / [EDQM FAQs in English](#) / [HEALTHCARE](#) / [Food contact materials](#) / [Metals and alloys](#) / Where can I find the Council of Europe's guidance on metals and alloys used in food contact materials and articles?

Answer:

The Council of Europe has published a technical guide for metals and alloys used in contact with food: 'Metals and alloys used in food contact materials and articles' (ISBN 978-92-871-7703-2). This guide is based on Council of Europe Resolution CM/Res(2013)9 and provides detailed information on test conditions and analytical methods for metals and alloys used in contact with food. The Resolution and the technical guide are recognised by most European national authorities.

This guide can be downloaded free of charge: <https://freepub.edqm.eu/publications>.

To order a hard copy via the [EDQM Store](#), click 'Catalogue' under 'Publications', then 'FOOD CONTACT' on the left side of the page.
