

How can I find a typical chromatogram of an EDQM reference standards?

You are here:

[EDQM FAQs](#) / [EDQM FAQs in English](#) / [PRODUCTS AND SERVICES \(Publications, Reference standards, CombiStats\)](#) / [EDQM reference standards](#) / [General information on EDQM reference standards](#) / How can I find a typical chromatogram of an EDQM reference standards?

Answer:

The EDQM provides chromatograms as follows:

1. In leaflets supplied with reference standards if required for their correct use as prescribed in a monograph. Leaflets can be downloaded from the [Eur. reference standards database](#).
2. In the [Knowledge database](#), when available and especially when they may prove helpful for interpreting a monograph (e.g. for difficult separations).

If a chromatogram is not available from one of these 2 sources, the EDQM does not provide it.
