What are the technical requirements for participating in webinars?

Answer:

You can attend and join a webinar session from anywhere using a compatible computer:

[List of System Requirements for Attendees](#)

You can also check your systems compatibility automatically:

[Attendees System Check](#)

If you wish to connect to audio using VoIP (Voice over Internet Protocol), you will need a fast Internet connection, a microphone and speakers. A USB headset is recommended. The VoIP connection is free. You are strongly advised to check with your IT Department that you can use your computer to connect to the webinar.

Electronic devices, such as smartphones and tablets, can interfere with microphone and speaker devices. Move any electronic handheld devices away from your microphone and speakers.
