

Which B-PTS studies does the EDQM organise each year?

You are here

[EDQM FAQs](#) / [EDQM FAQs in English](#) / [HEALTHCARE](#) / [Blood transfusion](#) / [Blood Proficiency Testing Scheme \(B-PTS\)](#) / [General information on the Blood Proficiency Testing Scheme \(B-PTS\)](#) / [Information related to B-PTS studies](#) / Which B-PTS studies does the EDQM organise each year?

The EDQM organises B-PTS studies in the fields of:

- **serology** (anti-HCV, anti-HIV/p24, anti-Treponema, HBsAg/Anti-HBc),
- **nucleic acid testing (NAT)** (HBV/HCV/HIV),
- **immunohaematology** (ABO, Rhesus, extended phenotyping and irregular antibodies),
- **microbiology** (bacterial testing of platelet components).

The EDQM continuously evaluates the need for other potential B-PTS studies.

A list of **B-PTS studies** for the current year is available on the [B-PTS](#) page on our website (a link is provided on the right side of the page).
