

Can I prevent users from modifying a template?

You are here:

[EDQM FAQs](#) / [EDQM FAQs in English](#) / [PRODUCTS AND SERVICES \(Publications, Reference standards, CombiStats\)](#) / [Statistics CombiStats](#) / [Using CombiStats](#) / Can I prevent users from modifying a template?

Answer:

Yes. It is possible to protect templates and datasheets from accidental modification. There are 4 levels of protection, which can be activated by clicking the padlock button in the menu bar. An optional password can be used to prevent unauthorised removal of the protection. For more information, see section 6.6 of the [CombiStats User Manual](#).
